About This Content

The Hawk first entered service with the RAF in 1976, both as an advanced flying-training aircraft and a weapons-training aircraft. The Hawk T1 version is currently used at RAF Valley for fast-jet pilot advanced flying training with No 208(R) Squadron, and at RAF Scampton by the RAF Aerobatic Team, the Red Arrows.

The T1A is used for weapons and tactical training on No 19(R) Squadron at RAF Valley, and by No 100 Squadron at RAF Leeming for advanced fast-jet weapons systems officer training and operational support-flying. In its weapons and tactical training role the Hawk is used to teach air combat, air-to-air firing, air-to-ground firing and low-flying techniques and operational procedures.

The team at VEAO Simulations have carefully re-created every detail of the exterior and cockpit of the Hawk, with assistance from real life Hawk pilots and ground crew, to give you the virtual experience of sitting in the real jet.

The Hawk cockpit is as realistic as sitting in the jet itself. Every switch is clickable, every dial has a function and every gauge reads exactly how the aircraft is performing.
Tool-tips show when you hover over a switch or dial to help you learn the function of the cockpit. Each switch and dial can be mapped to keyboard, joystick or a HOTAS system.

Full cockpit familiarization training missions are included to help you learn each function of the aircraft.

A high quality, External Flight Model (EFM) is included that has been flight tested by actual Hawk pilots.

KEY FEATURES:

- Accurate and highly detailed 3D interactive cockpit featuring six-degrees-of-freedom (6DOF) technology compatible with head-tracking devices and Oculus Rift.

- Accurate modelling of the Hawk HUD, instruments, gauges and dials.

- High fidelity accurate Advanced Systems Modelling (ASM) such as electrical, fuel, hydraulics, oxygen, pressurisation and air conditioning, temperature control, pitot-static, AHRS, lighting and weapons system modelled to detailed schematics.

- Highly detailed Hawk external 3D model and liveries.

- Fully interactive, comprehensive training missions make learning to fly the Hawk easier.

- Armament includes: AIM-9M Sidewinders, bombs, practice bombs, rocket pods and gun pod.

- Highly detailed damage model.

- High quality, external flight model tested by Hawk pilots.

"As a current Royal Navy aggressor pilot operating the Hawk T1, I was offered the opportunity to test the VEAO Hawk simulator. I was initially sceptical of how accurate the modelling would be of the handling and the jet engine response. To say I was impressed would be an understatement. I found the controls and aircraft responses accurate. The flight model performs as well as the full motion simulator used by the RAF. Flying in formation was easy and very similar to the real thing. I was extremely impressed by the headset integration and immediately felt operational pilots could benefit from training on this software.

In short, the VEAO Hawk is more than a game and comparable to a military grade full motion simulator. In fact, I would even go so far as to say the terrain graphics are higher fidelity whilst flying at low level."

- Lt Cdr Matt Deavin RNR, Hawk Pilot, Fast Jet Qualified Weapons Instructor

The DCS: Hawk plugs in seamlessly into the modular DCS: World framework, allowing you to fly the Hawk in a dynamic, fully realized combat environment, with and against capable air and ground threats. This module ships with Training and Singleplayer missions.

Wow, a very exciting strategy turned out. This is a strategy mixed with action. Here, the player needs to develop, improve, build, and so on. The idea of \u200b\u200bthe game is far from new, if I'm not mistaken, these were in the 90s, for the Moldov this is a very good nostalgia. The game is not demanding and easy to interface, which can not but rejoice. I like such games where you need to develop, build buildings, improve and simply progress. They give us their transport, which you will develop. There are updates for the game, so many bugs will disappear, that is, they will be repaired, which also gives a positive side. I like it.. I didn't expect such great songs. Our Kingdom Will Fall is one of the best songs I've heard in a long time. Whether a person listens to it with or without vocals. I keep Our Kingdom Will Fall on repeat.

If you like metal get it, if you want more atmosphere avoid it.. I DIDNT EVEN GET IT WHEN I BOUGHT IT, SUPPORT PLEAS!!!!. Took about 8 hours to beat, not as good as Loren Amazon Princess but not bad either.

The alchemy mini game was fun for a short while and then it became tiresome, wasn't hard at all though. Don't freak out about days, you have plenty of time for everything.

. It´s a cute little game, it has a great story but if you dont speak English too well, you may find it hard to know what you have to do at certain points. Nevertheless, you might find it hard to stop playing because you care about the characters and you want to know how the story proceeds.
One thing Ive noticed that there are a lot of relationships in this game, like she;s the daughter of him, he has two wifes at the same time, she wanted to merry him, but then she didnt, you have to help him to get a her, and so on...
But I have one question in particular. (Spoileralert)
That town is literally full of heroes, it even has an army which would be capable of defeating a whole nation, and I still have to face the boss alone? like wtf.... 2.5/10 Drin Score.

I am only recommending this game because it's free. A free game which will satisfy your VN craving as a light snack. Pretty short, it is a simple VN which is direct to the point. There are 9 endings.

It's good to play a puzzler in this day and age with some meat on its bones. But Art of Gravity fizzes and pops in all the right ways. It's fresh and intriguing, and it's not like anything else you've ever played before. And that's definitely to its credit.

This isn't a game that you're going to run through in a single sitting, it's going to take some time and consideration. But if you're looking for something to settle down with for the long haul, for something clever to really sink your teeth into, then you're in luck.

There's a thick and engaging experience here, and the way it builds on its sturdy foundations with intriguing new structures makes it one of the finest head-scratches that his hit mobile in the past few months.. interesting time management game. Some unusual features and it's fun to plan ahead your sandbox game. When you select sandbox game you can pick 3 goals to achieve. Some of it very hard to achieve simultaneously :) I'm glad I've bought this game, as a bonus it's in my native language with quality translation. Can't ask for more!. Still updates in 2019. u can do any set u want on gold edition
. Hey, I'm confused. On the very first level, the dragon lizards are insanely hard. Am I missing something, or do the enemies need to be tuned down?

There is a heal option but it only heals about 10 pts out of about 500 pts and the lizards hit for about 200 pts. I tried the defense option as well, but that didn't make a significant difference.

Until the enemies are made reasonable, I cannot approve the game right now. Please reply to this comment if I'm missing something.

EDIT: The combat with the lizards is fixed, but when I tried to enter the base with the robot in frount, the game didn't respond at all. It worked the first time. The reason I left the base in the first place was because I couldn't interact with anyone inside except some frankly bland comments from NPCs. I belive this is a bug in the game.

My question is wheter it is a bug in the game or if I'm supposed to do something. I explored the entire available map and I wasn't to interact with anything except the lizards and something like gold requiring a "resource extractor".. I want APK file , but have not. It complied is application, i have not project file.
Some game run uncomplete. Stop at title.
It cannot help know\/education about Programming.. Lets say it's Not Horibble...Well lets say it works.. 4\/10. - One of the worst shooter games I have ever played. Graphics are beautiful but the sniping sucks tremendously.

I was very excited to originally play this as it was my first ever Ghost Warrior and the game looked phenomenal...but when entering the game I truly realised why it was such a cheap price. The sniping mechanics of this game as god awful & truly not fun whatsoever. The story didn't really seem interesting whatsoever and if anything just an A-B-C objective. Just go here, go there etc.

I am disappointed but I guess not every game can be amazing. - The graphics were phenomenal for this game but the gameplay itself was not. Don't recommend.. I've played and enjoyed the other 2 games that this dev has put out and I'm so glad I've stuck with them to get to Apocalypse Hotel! I'm not a massive zombie fan generally, and it's creepy as hell fighting these guys at night, but I'm already too in love with what I've seen of the world and the species in it to give in to my fears! Being mobbed by loads of zombies by torchlight is super scary, almost as scary as the decor in some parts of the hotel itself! Haha! But I've upgraded some rooms and I'm making it work. It's retro!

Anyway, I'm going to go back to playing now, but I'm loving the interplay between aliens, zombies, mutants, and humans - it's a totally refreshing take on this genre and I can't wait to get further into the plot! Running smoothly on my not overly-fantastic laptop as well, so yay!
